

LentiVector™ Platform

Innovation-led lentiviral vector development and GMP manufacturing

Access OXB's proven platform to rapidly bring your lentiviral vector (LV) therapy to market

What makes our LentiVector™ platform unique?

320+

320+ GMP batches successfully released in the past 10 years

Track record

- ✓ 30 years of manufacturing experience (GMP manufacturing since 2014)
- ✓ Validated commercial platform
- ✓ Availability of Drug Masterfile with the FDA

1.9E+12^{TU}

Vector product generated for therapeutic gene at 200L scale

Performance

- ✓ Recognised as leading platform by emerging biotechs and pharma companies

9-fold

Titre improvement achieved for a LV-CAR product with OXB technologies

Innovation

- ✓ Technologies and process upgrades to improve vector titre, quality, potency, safety, consistency of manufacturing, and scalability

12-months

Fastest timeline achieved from client onboarding to released GMP batch

Fast to GMP

- ✓ Rapid entry to clinical trials without the need for tech transfer and process changes

40+

Number of countries with a commercially approved product using OXB's LV

Widely adopted

- ✓ Our LV are used with multiple programmes across all development stages
- ✓ Trusted by broad range of customers from emerging biotech to large pharmaceutical companies

8,000+

Number of patients treated using OXB's LV

Customer focus

- ✓ Ability to tech transfer the LentiVector™ platform to your facilities
- ✓ Strong focus on project management and communication

LentiVector™

We are a global quality and innovation-led CDMO in cell and gene therapy with 30 years of experience, committed to helping our clients deliver therapies that transform patients lives.

We offer end-to-end capabilities, from plasmid design and optimisation, to clinical and commercial GMP manufacturing, accompanied by robust control systems, analytical methods and deep regulatory knowledge.

Let's deliver life-changing therapies together
